

Introduction to Integrated Health Care

Our program aims to attract medical students who value culturally sensitive care and who have an interest in providing our communities with healthcare solutions.

Participants will experience an integrated healthcare system virtually:

- Understand population-based healthcare.
- Use technology in clinical settings.
- Develop relationships with clinical mentors.
- Receive weekly live virtual presentations.
- Have access to online learning platform.
- Meet The Permanente Medical Group from various clinical settings.

Current first-year medical students who will be rising 2nd year medical students in the summer of 2024 are encouraged to apply.

For more information and the application process please visit
