

Introduction to Integrated Health Care

Our summer program aims to attract rising second-year medical students who value culturally sensitive care and who have an interest in providing our communities with healthcare solutions.

Participants will experience an integrated healthcare system virtually:

- Cultural Humility and Leadership
- Culturally Sensitive Care
- Health Equity and Population Health
- Mentorship and Networking
- Patient Advocacy
- Team-Based Healthcare
- Introduction to GME-funded research publications

Current first-year medical students who will become second-year medical students in the summer of 2026 are encouraged to apply.

For more information and to apply please visit:
